

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1 (currently amended). A method for providing content to at least one of a recipient and at least one of a device comprising:

- (a) a user registering at least one of said recipient and at least one device with a computer server, said server in response to said registering providing an identifier identifying at least one of said recipient and said at least one of device;
- (b) said computer server providing said identifier identifying said at least one of said recipient and said at least one device to a plurality of different content providers, where said content providers [is] are separate from said computer server and separate from each other;
- (c) said at least one of said recipient and said at least one of device providing said identifier to a plurality of different said content providers, each of said content providers in response to having said identifier identifying respective said content desirable to said recipient;
- (d) each of said content providers providing said content to said computer server together with said identifier free from said computer server specifically requesting said content from respective ones of said content providers; and
- (e) said computer server, in response to receiving said content from said content providers, providing said content from each of said content providers to at least one of said at least one device and said recipient.

2 (Original). The method of claim 1, wherein said registering includes at least one of:

- (a) a communication protocol for providing said content to said device; and
- (b) an access technique for providing said content to said device.

3 (Original). The method of claim 2 wherein said registering is said communication protocol.

4 (Original). The method of claim 2 wherein said registering is said access technique.

5 (Original). The method of claim 1 wherein said identifier identifies said recipient.

6 (Original). The method of claim 1 wherein said identifier identifies said at least one device.

7 (Canceled).

8 (Original). The method of claim 1 further comprising said server providing said identifier to said recipient in response to registering said at least one device.

9 (Original). The method of claim 1 wherein said recipient indicates to said content provider desirable said content.

10 (Canceled).

11 (Original). The method of claim 1 wherein said content provided by said server is provided to said at least one device.

12 (Original). The method of claim 1 wherein said content provided by said server is provided to said recipient.

13 (Original). The method of claim 1 wherein said server and said content provider are interconnected to the Internet.

14 (Original). The method of claim 1 wherein said at least one device includes a pager.

15 (Original). The method of claim 1 wherein said at least one device includes a fax.

16 (Original). The method of claim 1 wherein said at least one device includes a mobile communication device.

17 (Original). The method of claim 1 wherein said at least one device includes a phone.

18 (Original). The method of claim 1 wherein said at least one device includes e-mail.

19 (Original). The method of claim 1 further comprising associating a user profile with said identifier.

20 (Original). The method of claim 19 further comprising providing said user profile to said server.

21 (Original). The method of claim 1 further comprising providing said identifier identifying at least one of said recipient and said at least one device to a plurality of content providers.

22 (Original). The method of claim 21 further comprising providing said content to said server from said plurality of content providers.

23 (Original). The method of claim 22 further comprising said server providing said content from said plurality of content providers to at least one of said at least one device and said recipient.

24 (Original). The method of claim 1 further comprising said server formatting said content to a format suitable for said at least one device.

25 (Original). The method of claim 1 further comprising said server formatting said content to a plurality of formats suitable for a respective one of said at least one device.

26 (Original). The method of claim 19 further comprising said server selectively providing said content to said at least one device based upon said user profile.

Appl. No. 09/782,910
Amdt. dated Sept. 22, 2005
Reply to Office Action of Jun. 10, 2004

27 (Original). The method of claim 26 wherein said profile includes information related to day of week preferences

28 (Original). The method of claim 26 wherein said profile includes information related to size of message restrictions.

29 (Original). The method of claim 26 wherein said profile includes information related to time of day restrictions.

30 (Original). The method of claim 26 wherein said profile includes information related to work schedule restrictions.
